

Every Family Will Soon Have to Unnecessarily Pay \$3000 A Year In Increased Energy Costs!

Emerging science clearly shows man is not causing global warming

Right now 13 million people are out of work. Many Americans cannot afford food for their table or a roof over their head. Emerging science is clearly showing that man CANNOT be causing global warming. America does not have to spend trillions of dollars by passing unneeded cap and trade legislation in a misguided effort to stop global warming. It is money wasted that should stay with taxpayers to stimulate our economy.

Story Ideas:

- Contrary to popular belief, emerging science is showing **MAN IS NOT CAUSING GLOBAL WARMING.**
- Emerging science clearly shows that the twentieth century warming was due to **SOLAR AND OCEAN OSCILLATIONS.**
- There has been **NO WARMING SINCE 2001** and the earth may be going into a 30 year global cooling even though **CO2** continues to increase.
- Rather than a pollutant, increased emissions of carbon dioxide can **INCREASE** food production by up to 50 percent.
- A large **CARBON FOOTPRINT MAY BE GOOD**, not bad.
- There is no need for **AMERICAN FAMILIES** to spend **\$3000 A YEAR** in a fruitless effort to stop global warming.

Meet Dr. Michael Coffman, Ph.D.

- Ph.D. in Ecosystems Analysis and Climate Influence.
- Conducted multi-million dollar research on global warming.
- Stopped the ratification in the US Senate of the UN Convention on Biological Diversity.
- Interviewed on over a thousand radio shows, including G. Gordon Liddy and others.
- Been on numerous local TV shows
- Been on C-Span twice.
- Produced numerous DVDs, the most recent of which is *Global Warming, Emerging Science and Understanding* (see right).
- Written four books, the most recent being the fast-paced historical novel *Dreamkillers, Abuse of Regulatory Eminent Domain* written for Mary Alice Davis (602-266-9270). (Release date June 2009; see right).

The DVD cover features the title 'Global Warming' in large, stylized orange and red letters at the top. Below it, the subtitle 'Emerging Science and Understanding' is written in smaller orange text. The central graphic is a line graph titled 'Global Temperature Data' showing 'Satellite Measured Temperature' (left y-axis, 0.0 to 0.9) and 'CO2 Concentration' (right y-axis, 270 to 390) from 2001 to 2008. The temperature line fluctuates around a slightly downward-sloping trend line, while the CO2 line shows a steady upward trend. To the right of the graph is a circular image of the Earth. Text at the bottom of the cover reads: 'Designed for showing in High and Middle School classrooms, but also suitable for all settings. Directed by Michael Coffman, Ph.D. Hosted by Kristie Pelletier.'

Two dozen leading international scientists using graphics and video clearly show that man cannot be causing global warming (released April 2009). Suitable for audiences 13 and older.
